CAI understands the key to successful GIS implementation and long-term sustainability is based on designing the system to meet users' needs. No two IGNITE packages are the same. Our team of experts collaborates with each client to customize implementation based on specific client needs and uses. CAI Technologies leverages our extensive local government GIS experience and solid understanding of ArcGIS Online technology to ensure our client's success with the ArcGIS Online platform.

The ArcGIS Online IGNITE package includes the following on-site services:

- Organizational needs assessment
- ArcGIS Online subscription settings configuration
- ArcGIS Online interface and tools review
- Best practices knowledge transfer for site configuration and branding
- Best practices knowledge transfer for authoring, organizing, and sharing content

- Create and share sampling of representative web maps and applications
- Identify and load sampling of representative content
- Additional feature overviews such as publishing content, accessing content with mobile devices, and using Esri Maps for Office

The IGNITE package also provides administrative knowledge transfer for:

- Management console and administrative tools usage
- Data management
- Securing content
- Credit usage
- Creating and configuring existing web application templates
- Cartographic considerations
